HEALTH CORNER

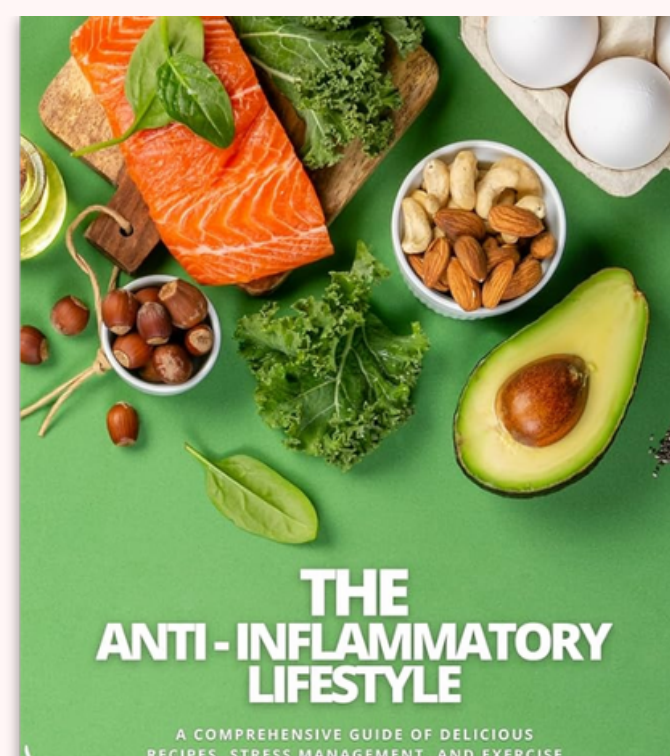

STRESS AND THE SILENT

FIRE OF INFLAMMATION

Not all battles within the body are visible. Inflammation is one of the body's greatest protectors, but when it remains long after the danger has passed, it quietly becomes one of its greatest enemies.

Growing evidence links poor gut health and chronic inflammation to conditions such as:

- * Heart disease**
- * Diabetes**
- * Obesity**
- * Autoimmune illness**
- * Depression**

The gut lining serves as a guardian — a carefully designed barrier between the outside world and the bloodstream. When that barrier is compromised, the effects may be felt far beyond the digestive system. A healthy gut is therefore not merely about comfort after meals; it is about resilience,

Health Challenge:

Ask yourself this week:

"Are my daily habits feeding health or feeding inflammation?"

Just as unseen inflammation can quietly harm the body, unseen burdens can quietly harm the spirit.

WESTBOURNE RD SEVENTH-DAY CHURCH

Theme: Reach the world: Media

**And he said unto them,
Go ye into all the world,
and preach the gospel
to every creature.**

Mark 16: 15
